Practical assignment Scenario

“You have been hired as a web designer by *RUNDA TSS School* to design a simple homepage for the Software Development department. The school wants all learners to create the same webpage layout using CSS visual rules.”

Task Instructions

Each trainee must submit:

1. index.html
2. style.css
3. Screenshot of the final styled webpage

Tasks

Using the provided HTML file (**homepage.html** on RTB e-learning platform), create a CSS file named: **style.css**

Then apply the following CSS visual rules exactly as instructed.

Required CSS Styling

1. Style the Webpage Background

Apply the following:

- Background color: lightblue
- Background image: any ICT-related image
- Background image should not repeat

2. Style the Main Heading (h1)

Apply:

- Font family: Arial
- Font size: 40px

- Font weight: bold
- Text color: darkblue
- Text alignment: center
- Text transform: uppercase
- Text shadow: 2px 2px 5px gray

3. Style the Paragraph (p)

Apply:

- Font family: Times New Roman
- Font size: 20px
- Font style: italic
- Text color: black
- Line height: 30px
- Letter spacing: 2px
- Word spacing: 5px
- Text indentation: 50px
- Text alignment: justify

4. Style the Navigation Links (a)

Apply:

- Text decoration: none
- Text color: white
- Background color: darkblue
- Padding: 10px

5. Apply Opacity

Create a <div> section and apply:

- Background color: orange
- Opacity: 0.5
